

# COVID 19 - The Global Pandemic

As of April 8, 2020, the world has 185 reported cases and 11 reported deaths per million people. United States has the highest (approx 400K) reported cases. Italy has the highest (over 17K) reported deaths. India has only 4 reported cases per million people. Color difference between African and European countries show how the countries with higher GDP per capita have been hit harder. Hover over map for more information.
